A FRIENDLY GREETING . . .

*and a word about what we
have and what we can do
for you this Fall - - -*

Dear Patron:

To have the opportunity of greeting you again this fall is a mellow pleasure. Doubtless, your problems since the last season have been much the same as ours, and you feel the same fine tang of refreshment that we do when we are able to say that we are nicely ready and well able to enter into this new fall season with you.

Nature has been wonderfully co-operative throughout this summer's growing season. We couldn't have ordered a better series of warm days, cool nights, and generous rains. Our perennial plants have flourishingly developed into clean-cut, well established merchandise. You may be sure that the material now awaiting your consideration is top-flight without exception.

Everything in current information points to a good and even above normal season. We can report nothing but co-operation and encouragement from the various government agencies. Thus far, the principal request has only been to increase our efficiency, and this is for our own good. As a matter of fact, we have a definite endorsement in the government instituted Victory Garden campaign, details of which are familiar to us all.

All in all, then, we can roll up our sleeves for another active season. Every facility for service is still adequately intact here, and you have the same sincere assurance that your every transaction with us shall be completed to your entire satisfaction. Let us hear from you; we'll appreciate the favor very much.

Cordially,

JFM:ms

Florists & CUT FLOWER GROWERS THIS IS IMPORTANT

This fall is the time to appreciate the place that hardy plants deserve in your business. Try them now; your results, expressing themselves in the vigorous demand for what you produce, will be nothing less than startling. With multitudes of fine perennials available, limiting your production during these difficult times, is not at all necessary.

Enlarge Your Hardy Plant Program and Your Profit Totals Will Enlarge Themselves

USE MORE PERENNIALS

IN THE GREENHOUSES

Cut from the benches or develop in pots for winter and early spring sales. **OUT OF SEASON DEMAND!**

IN FRAMES OR BEDS OUTSIDE

Cut crops or sell pot plants through **THREE SEASONS**, Spring, Summer, and Fall. **ECONOMY! SEASONAL DEMAND!**

WHAT WILL YOUR EXPERIENCE BE?

You will find that perennial flowers are quality flowers. They will equal any good thing that you are now growing. At all times they will move through any of the channels that you use to market your production. There never have been enough to satisfy the demand. Culture is simple and the economies they effect mean only that more of your selling price is left for you.

WHY WILL THE DEMAND BE SO ACTIVE?

Originality and novelty plus practical utility, definitely hardy plant virtues, do, in themselves, create demand. Creative artistry cannot find better material to apply, either exclusively or to highlight the whole of any decorative project.

ARE THEY EASY TO GROW?

Definitely yes. Cultural methods inside either for pot plants or cut blooms are as simple a procedure as exists in greenhouse growing. Generally, cool houses are used. Their vitality makes them disease resistant. Where special directions are necessary our long experience qualifies us to give them. We're always glad to dispense information. Outside procedure does not go beyond the normal rules of cultivation and normal procedure for the development of symmetrical, heavily cropped plants.

DON'T MISS THE SALES POSSIBILITIES EXISTING IN PERENNIALS DEVELOPED IN POTS. IN ANY SEASON, THEY SELL THEMSELVES WITH A CONVINCING ARGUMENT: AFTER THEY HAVE SERVED THEIR DECORATIVE PURPOSE INSIDE, THEY MAY BE PLANTED OUTSIDE TO BECOME A PERMANENT PART OF THE HARDY GARDEN, WHERE THEY WILL FLOURISH FOR MANY YEARS.

CONSIDER THESE FOUR GROUPS NOW:

1. Varieties for cut blooms
inside.

2. Varieties for pot plants
inside.

3. Varieties for cut blooms
outside.

4. Varieties for pot plants
outside.

The two pages following immediately present a special selection of perennial plant material wonderfully adapted to these uses. We are anxious to work with you this fall in the enlargement of your hardy plant program. You see, we feel sure that once tried as a principal feature of your production, you will continue through the years to base your programs with our premium hardy plant material, especially developed for this purpose.

These are the premium

Forcing Perennials

that answer the multitude of Florist-Grower problems concerning us all now.

Normally, it is hard to find a better opportunity to turn bench space or outside bed space into extra profit dollars. BUT NOW! All of the question marks around what to do to make money are answered by the unending number of ways to present your perennials for merchandising. Cut or in pots, developed on the greenhouse bench or outside in frames, they are money makers all the way. There has never been enough to satisfy the demand before; the situation is even more extreme now. Consider each one of these with special care—they will be well worth it, you may be sure.

Not a single plant that you receive will be taken from old, run-out clumps; rather, they are young and vital, insuring perfect performance in your plantings. The opportunities for developing business around "The Modern Orchid of the Garden" are substantial indeed. Anyone who is interested in flowering plants at all will be a willing purchaser of your Iris Kaempferi after they are exhibited. Their novelty is unending; the breath-taking display that they make each year is ever a wonderful surprise. Give these Iris Kaempferi every consideration; they'll give you "quality and performance."

Plant These "Progressive Growers' Bargains" This Fall

Two Selections—

Modern Cut Flower Perennials

—A Collection Bargain

GUARANTEE next summer's profits by taking advantage of the specialist's selections of fine cut-flower perennials offered here. Every one of these is novel on the cut-flower market, and growers report sales limited only by the amount that they can grow. Flower arrangers will be thrilled by the unending novelty and originality that can be created by using perennial flowers either exclusively or combined with what is habitually available. All of the varieties produce abundant crops; colors and flowering period are in nice balance. Plant this collection into any small ground area and market the crops through any medium you are using; your liberal profits will be proof enough of the value of your small investment.
